

seca quadra 808

Striving towards
uniqueness.

- Analysis of body fat and body water. For better control.
- Functional design. For safe operation.
- Undulated plastic base. For improved aesthetics in the bathroom.
- BMI function to determine nutritional status.
- More than 165 years of experience. For maximum precision.
- From the global market leader for medical weighing and measuring.

seca quadra 808: Special details.

Take a look at the four elegant load cells of brushed stainless steel which gently support the weighing platform of extra-strong safety glass. And indeed so delicately, that the platform appears to be floating.

Special design.

This design is not only exciting, but excitingly new. The glass plate sits on an undulated plastic base with an integrated display element. Form follows function. BMI and body fat and body water can be measured easily and precisely at the touch of a button. This is guaranteed by the optically transparent ITO (Indium Tin Oxide) coating, which is highly conductive and ensures uninterrupted skin contact during measuring. Thanks to four memory buttons, the scale repeatedly recognises its user. For people who are willing to do something more for their health and who are reliant on precise data.

Especially robust.

The unique shape of the base is elegant and slim, but also tough. It is finished with ABS plastic (acrylonitrile-butadiene-styrene) which withstands impacts, shocks and all commercially available cleaning and disinfection products. The glass platform, which is 8-millimetre-thick safety glass, is just as strong. Despite its elegant design, the seca quadra 808 is distinguished by a high level of robustness.

Especially well thought-out.

The memory buttons, facing the rear and attached to the base, are designed to prevent unintentional and potentially corrupting data entry during the measuring of weight, BMI, body fat and body water. You see, at seca, precision applies to accuracy of weighing and to simplicity of operation.

seca quadra 808

Technical data

- Capacity: 330 lbs / 150 kg
- Division: 0.2 lbs / 100 g
- Dimensions scale (WxHxD):
11.8 x 1.8 x 13.0 inch
- Weight: 6.2 lbs / 2,8 kg
- Functions: BF/BW measurement, BMI, Auto-HOLD, automatic switch-off
- Parts to be delivered:
4 AAA batteries,
4 extension feet for carpets

Four load cells of brushed stainless steel.

The undulated plastic base.
